Moodboard

The Character was inspired by the Disney – Little Mermaid animation. The sidekick was inspired by a sea star.

Regarding the colour scheme, I decided to go with marine shades such as blues and purples. The star however has a golden colour in order to make a contrast with the main character.

The main character's front image has an "S" shape as it relates to her name "Syrene"

This way the hero has a more iconic and recognizable image.

## Character design

The character represent a chat bot that can be implemented on websites. Even though mermaids have been portrayed as evil in some cultures / mythology Syrene relates more to Ariel, she helps users navigate through websites to make sure they land on the desired “island” (pages).

She also has a little sea star helper Shinny that teleports and finds the information in order for Syrene to decide what is actually relevant for the user.
